## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, see pages 10 and 11 of the amendment, filed September 28, 2005, with respect to the rejections of claims 18-24 have been fully considered and are persuasive.

Witteveen does not read on the claims because it does not teach that the mirror body remains in a fixed position with respect to the bearing shell when not activated due to the presence of the inertial force. The rejections of claims 18-24 have been withdrawn.

### *Allowable Subject Matter*

2. The following is a statement of reasons for the indication of allowable subject matter. Claims 1-17 are allowable. Reasons for allowance of claims 1-17 were given in the Office Action mailed on May 27, 2005.

Independent claim 18 is allowed because the prior art of record fails to teach or fairly suggest an adjustable beam deflector comprising: said inertial force being substantially the same at each of the plurality of beam deflecting positions, and said beam deflecting movable element to remain in a fixed position with respect to said fixed element when not activated due to the presence of said inertial force; in combination with the other recited limitations in the claims.

Claims 19-24 are allowed by virtue of their dependence on claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

Upon further review, Laor (6,526,194) does not read on claims 18, 22, and 23. The inertial force provided between the mirror housing and hinge (11) is NOT substantially the same at each of the plurality of beam deflecting positions. In fact, Laor teaches the opposite. Laor teaches that the flexure force in the hinge (11) increases as the mirror (9) rotates. (See Col. 7, ll. 60-67)

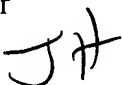

Therefore, Laor does not teach or fairly suggest claims 18-24.
